

Lesson 3

A-Level Pure Mathematics, Year 1 Additional Mathematics Integration I

3.1 Integration with Fractional Powers

Fractional powers arise quite naturally in integration questions, not least because

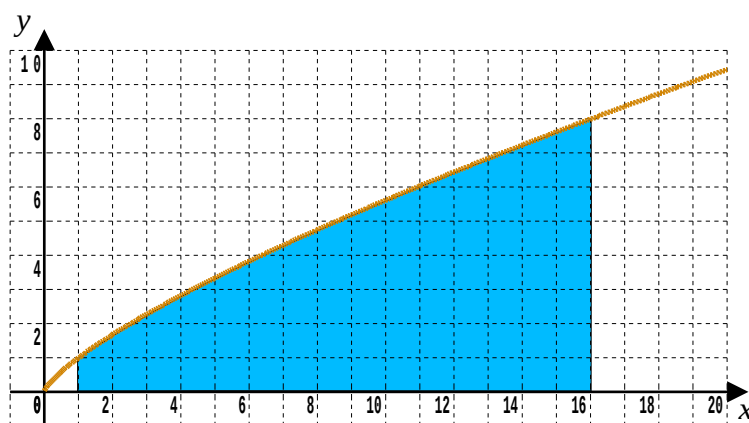

$$\sqrt{x} = x^{\frac{1}{2}}$$

Although the rule to integrate expressions containing such powers is no different to that for integrating integer powers, there is a skill in avoiding multi-decker fractions, as the next example will demonstrate.

3.2 “Fractional Power” Example

The curve graphed is of the equation $y = x^{\frac{3}{4}}$

Determine the shaded area.

[4 marks]

3.3 Exercise

*Any solution based entirely on graphical
or numerical methods is not acceptable*

Marks Available : 40

Question 1

Show that $\int_4^{25} \sqrt{x} \, dx = 78$

There is a bonus mark for not having any multi-decker fractions in your working !

[4 marks, plus 1 bonus mark]

Question 2

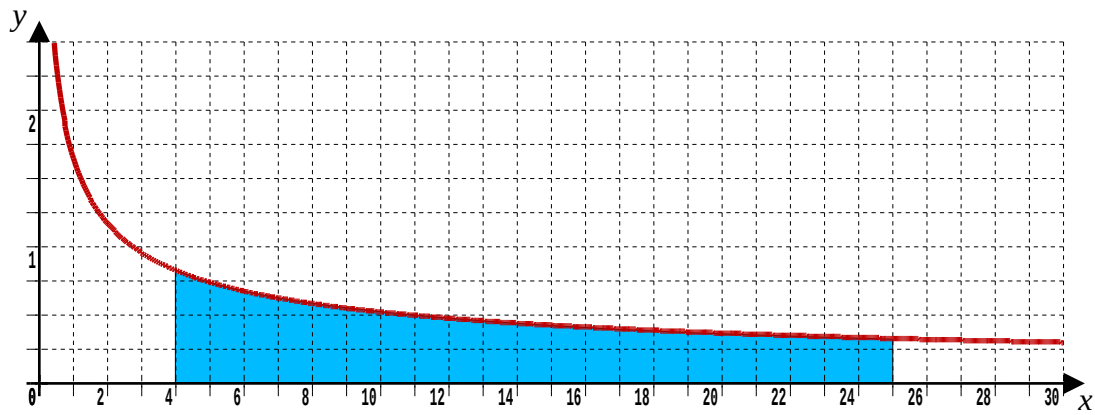

Determine the exact value of $\int_0^3 \sqrt{3x} \, dx$

HINT : $\int_0^3 \sqrt{3x} \, dx = \sqrt{3} \int_0^3 \sqrt{x} \, dx$

[4 marks]

Question 3

The graph shows the curve with equation $y = \frac{5}{3\sqrt{x}}$

Determine the exact value of $\int_4^{25} \frac{5}{3\sqrt{x}} dx$

HINT : $\frac{5}{3x^{\frac{1}{2}}} = \frac{5x^{-\frac{1}{2}}}{3}$

[5 marks]

Question 4

Given that $y = \frac{\sqrt{x} + 1}{3}$ find in the simplest form $\int_1^4 y \, dx$

HINT : $\int_1^4 \frac{\sqrt{x} + 1}{3} \, dx = \frac{1}{3} \int_1^4 \sqrt{x} + 1 \, dx$

[5 marks]

Question 5

A-Level Examination Question from June 2009, Paper C2, Q1 (Edexcel)

Use calculus to find the exact value of

$$\int_1^4 (2x + 3\sqrt{x}) \, dx$$

[5 marks]

Question 6

A-Level Examination Question from January 2017, Paper C12, Q7(ii) (Edexcel)

Given that k is a constant and

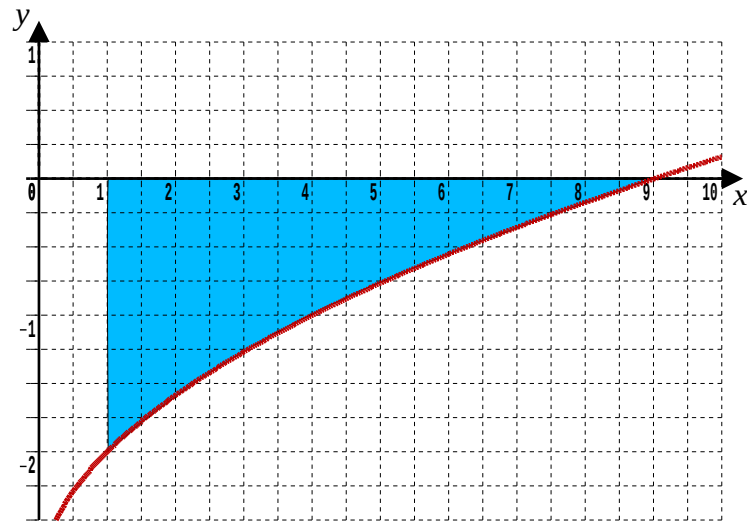

$$\int_2^4 \left(\frac{4}{\sqrt{x}} + k \right) dx = 30$$

find the exact value of k

[6 marks]

Question 7

The curve graphed below is of the equation $y = \sqrt{x} - 3$

Taking great care over the minus signs in the working, determine the shaded area.

[6 marks]

Question 8

A-Level Examination Question from May 2007, Paper C2, Q1 (Edexcel)

Evaluate

$$\int_1^8 \frac{1}{\sqrt{x}} dx$$

giving your answer in the form $a + b\sqrt{2}$, where a and b are integers

[4 marks]
